

MOHAMED JASEEN

Software Developer | Java • Spring Boot • Python • REST APIs • SQL
9345414821 | mohamedjaseensofdev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend-focused Software Developer with hands-on experience building RESTful APIs and full-stack applications using Java, Spring Boot, Python, and React. Skilled in relational database design (PostgreSQL, SQLite, MySQL), JWT-based authentication, and machine learning integration (TensorFlow, Scikit-learn), with a solid grasp of OOP, data structures, and clean, maintainable code. Proven ability to deliver secure, well-tested backend services and AI-powered applications through internships and independent full-stack projects.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL
Backend: Spring Boot, FastAPI, REST API Development, Spring Security, JWT Authentication
Frontend: React.js, Tailwind CSS, Vite
Databases: PostgreSQL, SQLite, MySQL, MongoDB, Spring Data JPA/Hibernate
ML / AI: TensorFlow, Keras, Scikit-learn, Pandas, NumPy, SHAP
Tools: Git, GitHub, Maven, Postman, PostgREST, Docker
Concepts: OOP, Data Structures & Algorithms, MVC Architecture, RESTful Design, RBAC, Agile/SDLC

WORK EXPERIENCE

Backend Developer Intern — Ethical Intelligent Technologies LLP (*Feb 2026 – Aug 2026*)

- Engineered and customized REST APIs in Java, Spring Boot, and PostgREST for a Hospital Asset Tracking and Management System, implementing CRUD, bulk, and synchronized-operation workflows.
- Designed PostgreSQL schemas and PL/pgSQL functions, and implemented JWT-based authentication with Role-Based Access Control (RBAC) for hospital and branch-level data access.

Backend Developer Intern (Virtual) — AICTE – Microsoft Azure Collaboration (*May 2025 – Jun 2025*)

- Built an end-to-end Python backend pipeline to preprocess and serve text data through a classification service, applying TF-IDF feature extraction and tokenization.
- Integrated Firebase for real-time data updates and deployed the trained model as a backend REST service.

Web Development Intern — Live Wire Private Limited (*Jun 2024 – Jul 2024*)

- Developed server-side input validation and authentication logic for a secure login module and conducted functional testing to identify and resolve defects.

PROJECTS

Hospital Asset Tracking & Management System — *Java, Spring Boot, PostgreSQL, REST APIs, JWT, Angular*

- Built and customized REST APIs for Asset CRUD, Gateway Management, BLE Tag Management, and Location Management, supporting hierarchical asset tracking across Hospital → Branch → Block → Floor → Department → Room.
- Implemented PL/pgSQL functions and database triggers for automated audit timestamps, location updates, and event synchronization; integrated backend APIs with an Angular frontend for configurable dashboards and reports.

Comfortable Diet Planner — *Java, Spring Boot, React, PostgreSQL* | [Live Demo](#)

- Engineered a full-stack diet-planning application with a Spring Boot 3/Java 21 REST API backend and a React/TypeScript frontend, using Spring Security and JWT for authentication and Spring Data JPA/Hibernate for PostgreSQL persistence.
- Built Recharts-based dashboards for interactive nutrition data visualization and AI-driven diet recommendations.

CreditIQ – Credit Risk Assessment — *Python, FastAPI, TensorFlow, Scikit-learn* | [Live Demo](#)

- Built an ensemble credit-risk prediction system combining CNN, BiLSTM, and TabTransformer models with Scikit-learn and TensorFlow, exposed through a FastAPI REST service with JWT authentication.
- Implemented SHAP-based model explainability and automated PDF/Excel reporting; containerized the service with Docker for reproducible deployment.

Movie Review Sentiment Analyzer — *Python, FastAPI, NLTK, Scikit-learn* | [Live Demo](#)

- Developed an NLP sentiment-analysis service with FastAPI, TF-IDF vectorization, and Logistic Regression over SQLite, with JWT authentication, multi-language detection (Langdetect), and automated PDF/Excel reporting (ReportLab, OpenPyXL).

EDUCATION

B.Tech, Information Technology — B.S. Abdur Rahman Crescent Institute of Science and Technology (*2022 – 2026*)

CGPA: 7.7 | HSC: 88% (2022) | SSLC: 91% (2020)

CERTIFICATIONS

Java (Basic) – HackerRank | SQL (Intermediate) – HackerRank | MongoDB Basics – MongoDB University | Python for Beginners – Infosys Springboard
